Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, and 20, drawn to a mixture calcium phosphate paste, a bone kit, method of bone repair, classified in class 424, subclass 426.
- II. Claims 18 and 19, drawn to a method of preparing hydroxyapatite, classified in class 523, subclass 114+.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by the process disclosed in WO'906.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Brion P. Heaney on May 03, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2165

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
